## What they say...

*« We had the privilege of discovering the Smart Factory,  
in the shoes of the operator throughout the product manufacturing process.*

*Each workstation has its own tool for real-time monitoring of the manufacturing  
process and digital means for carrying out its work in the best possible conditions.*

*This serious process plays a perfect role in understanding the benefits of such  
a software suite, in a totally immersive and fun way! »*

*Bénédicte GRANIER & David CONSIGNY  
Auvergne-Rhône-Alpes Entreprises*
